HOW WE IMPLEMENT

Business Study & Gap Analysis

We always meet with the core people of different departments to help them in way that, nexERP will be an easy use system for them. We are experts in retail, FMCG, Production, Contracting domain. Likewise we do research to identify the benchmarks in each domain to customize the application.

Blueprint of prospective solution

It is always better to give you an exact idea about how the system will work and how that is going to influence your business positively. While implementing nexERP you will get a 100% clarity about the system and its final deliverables. This helps to avoid last minute surprises. Before implementing the solution itself, everything will be live in front.

Seamless implementation & support.

nexERP implementation will happen as per the locked requirement with phased out schedules. nexERP supports both online and offline implementations, our expert team can access system or cloud server remotely for the success completion of implementation process. Scheduled training and after sales support is our key area.

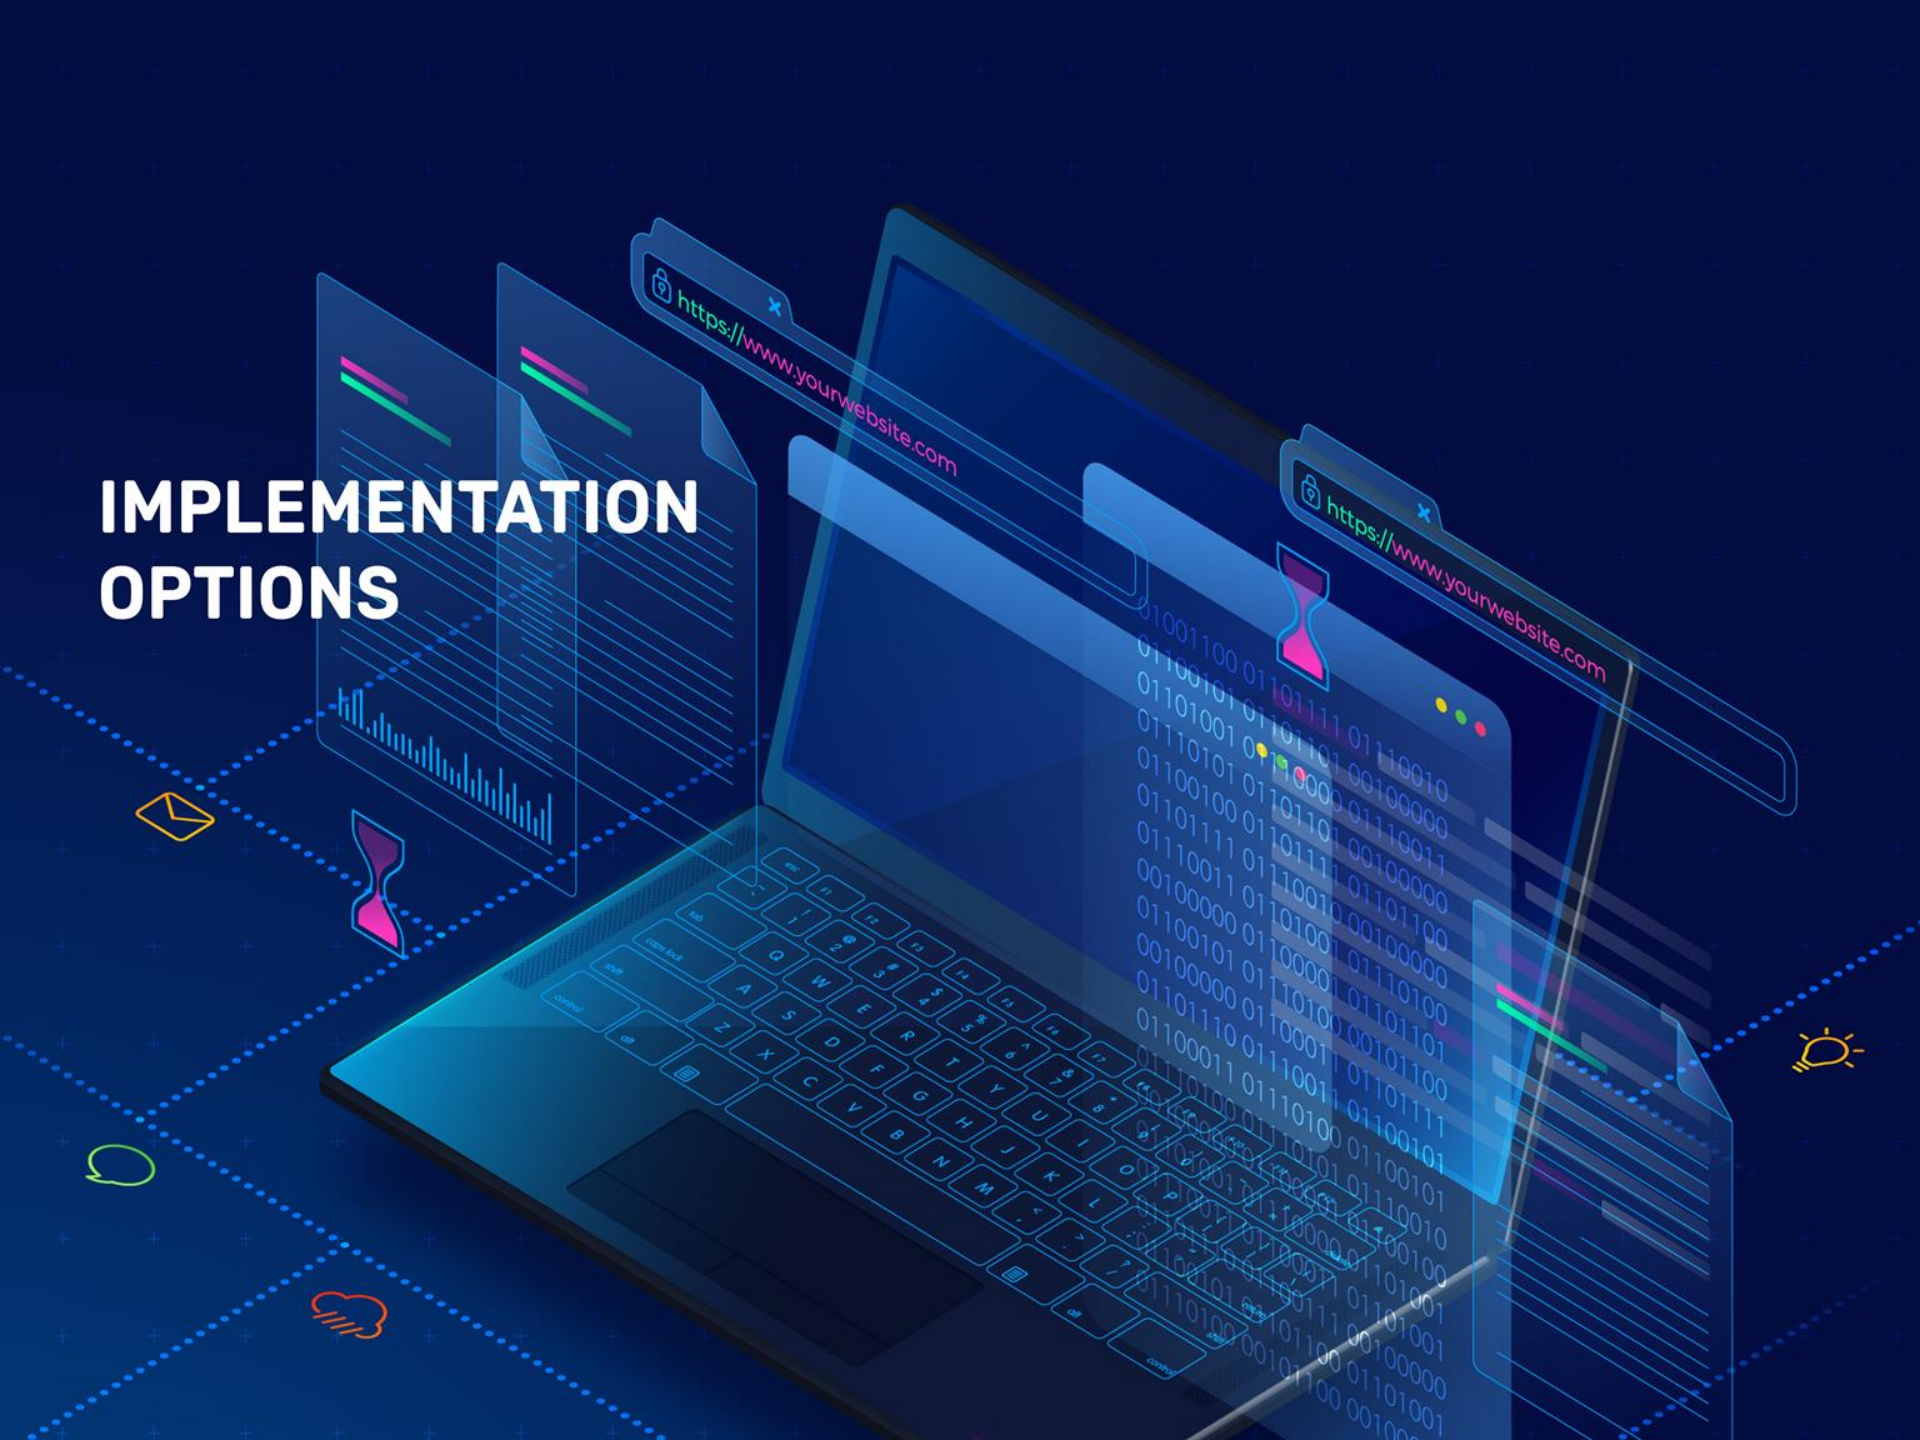
IMPLEMENTATION OPTIONS



OPTION 01

Cloud/server/Online Implementation

nexERP supports live server/cloud hosting for users. Online hosting allows users to access data from anywhere in the world.

OPTION 02

Offline Implementation [LAN]

nexERP supports offline server hosting (LAN) for users who have no internet connection in their office. It is ideal for offices that runs on a string budget. It provides the same option as that that of online hosting at a low cost.

OPTION 03

Hybrid Implementation

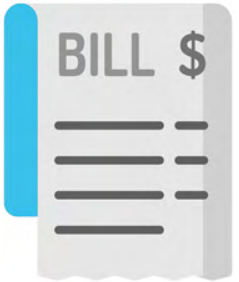
nexERP supports syncing of online and offline version. We can implement the system in LAN and can link with the online server on a particular time interval to sync data online.

KEY FEATURES

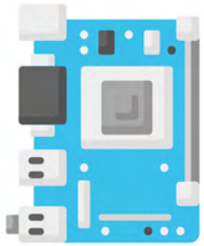
Multi Language Support
nexERP provides multiple language as per the needs of the customers. The current language includes English and Arabic; however more languages can be integrated in the future as per the need of the customers.

User Activity Tracking
nexERP solutions helps to track any changes that is made to the software. A complete report (user log) of all activities done by any particular can be checked. It can remove any malpractices that can happen in the office.

Bill Uploading Provision
nexERP provides the provision for uploading the scanned copy of bills, vouchers, and invoice along with the transaction bill. This makes it easy for the concerned person to tract the transaction along with the bill in the future.



Effective Approval System
nexERP provides effective approval system for the purpose of approving a payment or work flow from superior officers. This helps in the smooth functioning of the organization



Hardware integration Possible
nexERP provides for hardware integration to the software. This includes integrating billing machine, weighing machine etc. with the software.

Custom Mobile Apps available
nexERP has the provision to integrate the software with mobile application. Once integrated, the users can check any data on the go from anywhere in the world.

Business success attains only when you get the hassle-free opportunity to manage your operations while enjoying your **time with freedom.** nexERP is designed for you for managing your challenges.

LISTEN TO SOME OF OUR HAPPY CUSTOMERS

We have worked with Richinnovations a couple of times and it was the best digital marketing process and outcome I have had in years. They are exceedingly disciplined, process-oriented, and effective. They set up a plan, a target and their team aggressively and effectively worked the agreed idea of digital marketing. Their straight forward, extremely driven approach is highly welcomed. They are tenacious and resourceful in ensuring successful outcomes and I extend my heartiest congratulations on their 5th anniversary to Richin and team who have shaped and sustained the firm in its evolution.

- M/s. HairFair Healthcare Clinic, Kerala.

Richinnovations has been an exceptional partner to our company. They have provided outstanding services and business solutions, tailor-made to fit our unique needs in the manufacturing industry. Specifically, their accounting tool and workflow engine were high-value additions to our Financial department. Similar was the case with the raw material management and staff management that helped in the optimal utilization of resources. I would highly recommend them to any organization.

- M/s. Dufab Cloud Industries, UAE

THEY ARE USING NEXERP FOR YEARS!
